

Program

19	Chapter 1. Basic Concept of This Book
33	Chapter 2. Individual Types of Cancer
35	00. General Outline
49	01. Esophagus Cancer
57	02. Gastric Cancer
67	03. Colorectal Cancer
77	04. Liver Cancer
89	05. Gallbladder Cancer
97	06. Bile Duct Cancer
105	07. Duodenal papilla Cancer
111	08. Pancreatic Cancer
119	09. Lung Cancer
135	10. Breast Cancer
143	11. Uterine Cervical Cancer
151	12. Uterine Corpus Cancer
161	13. Ovarian Cancer
169	14. Prostate Cancer
179	15. Renal Cell Carcinoma
185	16. Bladder Cancer
191	17. Malignant Lymphoma
205	18. Leukemia
221	20. Other Types of Cancer
225	Chapter 3. Calculation Basis of Number of Patients

8	Breast cancer ⇒ Total survivors increase to 9 times.	37
9	Breast cancer ⇒ Over 480 thousand patients are subject to chemotherapy?	37
10	Uterine cancer ⇒ Uterine cervix cancer levels off, while uterine corpus cancer increases steeply.	38
11	5-year survival rate at 32.71%. Respiratory cancer has less total survivors, due to lung cancer.	38
12	Lung cancer claims highest mortality	38
13	Pancreatic cancer is worst with least 5-year survival rate at 6.3%.	39
14	Malignant lymphoma & Leukemia have various forms of disease.	39
15	Which cancer ranks in top five of survival rate?	39
16	88 types (88 sites) are all about cancers.	40
	(Table-1-1) Transition of the number of new-onset patients by site ①	41
	(Table-1-2) Transition of the number of new-onset patients by site ②	42
	(Appendix to Table-1) Names of sites based on the ICD classification	43
	(Table-2) Transition of the number of total surviving patients by sites	44
	(Table-3) The number of patients and its 5-year survival rates (Total of Malignant neoplasm and total of 19 types of cancer)	45
	(Table-4) The ratio of each site in Malignant neoplasm	45
	(Table-5) The ratio of the number of new-onset and total surviving patients in major sites	46
	(Table-6-1) Transition of the number of deaths ①	47
	(Table-6-2) Transition of the number of deaths ②	48

01. Esophagus Cancer 49

1	Summary	49
2	Future Projections	50
	(Table-1) 5-year survival rates by treatment in Comprehensive Registry of esophagus cancer	51
	(Table-2) 5-year survival rates in Association of Clinical Cancer Centers (ACCC)	51
	(Table-3) 5-year survival rates of esophagus cancer	51
	(Table-4) Treatment by stage in esophagus cancer	52
	(Table-5) Surgery rate of esophagus cancer	52
	(Table-7) 5-year survival rates by stage in resected cases of esophagus cancer (Registration survey)	52
	(Table-8) 5-year survival rates by stage in resected cases of esophagus cancer (Association of Clinical Cancer Centers)	52
	(Table-10) Calculation of survival rate for each year	53
	(Table-11) Calculation of total surviving patients of esophagus cancer (2001)	53
	(Table-12) Calculation of total surviving patients of esophagus cancer by definite integration (2001)	53
	(Table-13) Transition of the number of esophagus cancer patients (our estimates)	54
3	References	55

02. Gastric Cancer 57

1	Summary	57
2	Future Projections	58
	(Table-1) 5-year survival rates of surgical cases	59
	(Table-2) 5-year survival rates of surgical cases by stage	60
	(Table-3) 5-year survival rates of resected cases in the Registration survey (1991 vs.2001 year)	61
	(Table-4-1) 5-year observed survival rates in Association of Clinical Cancer Centers (ACCC)	61
	(Table-4-2) 5YSR of non-surgical cases	61
	(Table-5) 5-year survival rates of gastric cancer for total cases	61
	(Table-6) 5-year survival rates of gastric cancer by stage	62

(Table-7) Survival rate for each year of gastric cancer (ACCC)	62
(Table-8) Calculating survival rate for each year	63
(Table-9) Calculation of total surviving patients of gastric cancer (2000)	63
(Table-10) Calculation of total surviving patients of gastric cancer by definite integration (2000)	63
(Table-11) Transition of the number of gastric cancer patients (our estimates)	64
3 References	65

03. Colorectal Cancer..... 67

1 Summary	67
2 Future Projections	68
(Table-1) 5-year survival rates of colorectal cancer • surgical cases	70
(Table-2) 5-year survival rates of surgical cases in colorectal cancer by stage (Multi-Institutional Registry of Large Bowel Cancer in Japan)	70
(Table-3) 5-year survival rates of surgical cases in colorectal cancer by stage (Association of Clinical Cancer Centers (ACCC))	71
(Table-4-1) 5-year observed survival rate in ACCC	71
(Table-4-2) 5YSR of non-surgical cases	71
(Table-5) 5-year survival rates of colorectal cancer	71
(Table-6) 5-year survival rate of colorectal cancer by stage (ACCC)	71
(Table-7) Survival rate for each year of colorectal cancer (ACCC)	72
(Table-8) Calculating of Survival rate for each year	72
(Table-9) Calculation of total surviving patients of colorectal cancer (2000)	73
(Table-10) Calculation of total surviving patients of colorectal cancer by definite integration (2000)	73
(Table-11) Transition of the number of colorectal cancer patients (our estimates)	74
3 References	75

04. Liver Cancer 77

1 Summary	77
2 Future Projections	78
(Table-1) Survival rates of liver cancer – follow-up survey	80
(Table-2) Transition of survival rates of liver cancer	80
(Table-3) Survival rate of liver cancer in ACCC and academic documents	81
(Table-4) The ratio of each treatment in various surveys	81
(Table-5) Survival rates for hepatocellular carcinoma (HCC) by treatment (1994-2005 year cases)	82
(Table-6) Survival rates of HCC • resected cases in academic documents	82
(Table-7) Survival rates of liver cancer • RFA cases in academic documents	83
(Table-8) Survival rate for each year of liver cancer (1994-2005 year cases)	83
(Table-9) Total surviving patients of liver cancer for 10 years (2000)	84
(Table-11) Total surviving patients of liver cancer for 10 years by definite integral (2000)	84
(Table-12) Transition of the number of liver cancer patients (our estimates)	85
(Table-13) Personal medical history of liver cancer	85
(Table-14) Number of deaths for liver cancer (Vital Statistics)	86
3 References	87

05. Gallbladder Cancer 89

1 Summary	89
2 Future Projections	90

(Table-1) 5-year survival rates of resected cases in gallbladder cancer	91
(Table-2) 5-year survival rates by stage in Registration survey	91
(Table-3) Resection rates for gallbladder cancer	92
(Table-4) 5-year survival rates of gallbladder cancer	92
(Table-5) Survival rate for each year of gallbladder cancer • resected cases	92
(Table-6) Survival rate for each year of gallbladder cancer • non-resected cases	92
(Table-7) Survival rate for each year of gallbladder cancer	93
(Table-8) Calculation of total surviving patients of gallbladder cancer (2001)	93
(Table-9) Calculation of total surviving patients of gallbladder cancer by definite integration (2001)	93
(Table-10) Transition of the number of gallbladder cancer patients (our estimates)	94
3 References	95

06. Bile Duct Cancer 97

1 Summary	97
2 Future Projections	98
(Table-1) 5-year survival rates of resected cases in bile duct cancer	99
(Table-5) Resection rates of bile duct cancer	99
(Table-6) 5-year survival rates of bile duct cancer	99
(Table-7) Survival rate for each year of bile duct cancer • resected cases	100
(Table-8) Survival rate for each year of bile duct cancer • non-resected cases	100
(Table-9) Survival rate for each year of bile duct cancer	100
(Table-10) Calculation of total surviving patients of bile duct cancer (2001)	100
(Table-11) Calculation of total surviving patients of bile duct cancer by definite integration (2001)	101
(Table-12) Transition of the number of bile duct cancer patients (our estimates)	101
3 References	102

07. Duodenal papilla Cancer 105

1 Summary	105
2 Future Projections	105
(Table-1) 5-year survival rates of resected cases in duodenal papilla cancer	107
(Table-2) Calculation of total surviving patients of duodenal papilla cancer (2001)	107
(Table-3) Calculation of total surviving patients of duodenal papilla cancer by definite integration (2001)	107
(Table-4) Transition of the number of duodenal papilla cancer patients (our estimates)	108
3 References	109

08. Pancreatic Cancer 111

1 Summary	111
2 Future Projections	112
(Table-1) Survival rate of pancreatic cancer in Registration survey	113
(Table-2) Resection rates of pancreatic cancer	113
(Table-3) Histological distribution of pancreatic cancer	114
(Table-4) Survival rate of invasive pancreatic cancer • resected cases	115
(Table-6) 5-year survival rates of pancreatic cancer • non-resected cases	115
(Table-7) 5-year survival rate of invasive pancreatic cancer by stage	115
(Table-8) 5-year survival rate of invasive pancreatic cancer • resected	

cases by stage	115
(Table-9) Survival rate for each year of pancreatic cancer	116
(Table-10) Calculation of total surviving patients of pancreatic cancer (1995)	116
(Table-11) Calculation of total surviving patients of pancreatic cancer by definite integration (1995)	116
(Table-12) Transition of the number of pancreatic cancer patients (our estimates)	117
3 References	118

09. Lung Cancer..... 119

1 Summary	119
2 Future Projections	120
①Transition of all cases of lung cancer	120
②Non-Small-Cell Lung Cancer and Small-Cell Lung Cancer	121
a) Number of New-onset Patients	121
b) Total surviving patients	121
(Table-1) 5-year survival rates and composition ratio of lung cancer · NSCLC · SCLC	123
(Table-2) 5-year survival rate of lung cancer · surgical cases (data from academic documents)	123
(Table-3) 5-year survival rate of lung cancer · surgical cases	124
(Table-4) Lung Cancer Registry Survey by a Japanese Joint Committee for Lung Cancer Registration (surgical cases)	124
(Table-5) 5-year survival rate of lung cancer · surgical cases	124
(Table-6) 5-year survival rate of lung cancer · surgical cases	125
(Table-7) Surgery rate in various survey (data from academic documents)	125
(Table-9) 5-year survival rate of lung cancer	126
(Table-10) 5-year survival rate of lung cancer by stage	126
(Table-11) 5-year survival rates of NSCLC and SCLC	126
(Table-12) Survival rates for each year of lung cancer (ACCC)	127
(Table-13) Calculating Survival rate for each year	127
(Table-14) Calculation of total surviving patients of lung cancer (2002)	127
(Table-15) Calculation of total surviving patients of lung cancer by definite integration (2002)	128
(Table-16) Calculation of total surviving patients of NSCLC & SCLC (2002)	128
(Table-17) Transition of the number of lung cancer patients (our estimates)	129
(Table-18) Transition of the number of new-onset lung cancer patients (Total, NSCLC, SCLC) — estimate basal year 2002—	130
(Table-19) Transition of the number of total surviving patients for NSCLC and SCLC (our estimates)	131
(Table-20) Transition of the number of total surviving patients for NSCLC and SCLC (definite integration)	132
3 References	133

10. Breast Cancer 135

1 Summary	135
2 Future Projections	136
(Table-1) Comparison of Registration survey	137
(Table-2) 5-year survival rates of breast cancer by stage	137
(Table-3) Calculation of 10 year survival rate for breast cancer	137
(Table-4) 10 year survival rate of breast cancer by stage	137
(Table-5) 10 year survival rates of breast cancer by stage (adjusted for 1997)	138
(Table-6) Survival rate for each year of breast cancer (1~5YSR)	138

(Table-7) Survival rate for each year of breast cancer (6~10YSR)	138
(Table-8) Calculation of total surviving patients of breast cancer for 10 years (1997)	139
(Table-9) Calculation of total surviving patients of breast cancer for 10 years by definite integration (1997)	139
(Table-10) Transition of the number of breast cancer patients (our estimates)	140

3 References	141
--------------	-----

11. Uterine Cervical Cancer 143

1 Summary	143
2 Future Projections	144
(Table-1) 5-year survival rates of uterine cervical cancer in various data	145
(Table-2) Surgery rates of uterine cervical cancer	145
(Table-3) Ratio of each treatment in uterine cervical cancer	145
(Table-4) 5-year survival rates of uterine cervical cancer by stage (2001)	146
(Table-5) Number of uterine cancer deaths (2001)	146
(Table-6) Survival rates for each year by stage	146
(Table-7) Calculation of total surviving patients of uterine cervical cancer (2001)	147
(Table-8) Calculation of total surviving patients of uterine cervical cancer by definite integration (2001)	147
(Table-9) Transition of the number of uterine cervical cancer patients (our estimates)	148
(Table-10) Cancer incidence of uterine cervical cancer	149
3 References	150

12. Uterine Corpus Cancer 151

1 Summary	151
2 Future Projections	152
(Table-1) 5-year survival rates of uterine corpus cancer in various data	154
(Table-2) Surgery rates of uterine corpus cancer	154
(Table-3) Ratio of each treatment in uterine corpus cancer	154
(Table-4) 5-year survival rates of uterine corpus cancer by stage (2001)	155
(Table-5) Number of uterine cancer deaths (2001)	155
(Table-6) Survival rates for each year of uterine corpus cancer by stage	155
(Table-7) Calculation of total surviving patients of uterine corpus cancer (2001)	156
(Table-8) Calculation of total surviving patients of uterine corpus cancer by definite integration (2001)	156
(Table-9) Transition of the number of uterine corpus cancer patients (our estimates)	157
(Table-10) Cancer incidence of uterine corpus cancer	158
3 References	159

13. Ovarian Cancer..... 161

1 Summary	161
2 Future Projections	162
(Table-1) 5-year survival rates of ovarian cancer by stage	163
(Table-2) 5-year survival rates of ovarian cancer by stage (foreign countries)	163
(Table-3) 5-year survival rates of ovarian cancer by stage (with or without PAC)	163
(Table-4) 5-year survival rates of ovarian cancer	164
(Table-5) Ratio of each treatment in ovarian cancer	164
(Table-6) Distribution of histopathological classification in ovarian cancer	164

(Table-7) Survival rate for each year ovarian cancer (1997)	165
(Table-8) Calculation of total surviving patients of ovarian cancer (1997)	165
(Table-9) Calculation of total surviving patients of ovarian cancer by definite integration (1997)	165
(Table-10) Transition of the number of ovarian cancer patients (our estimates)	166
3 References	167

14. Prostate Cancer..... 169

1 Summary	169
2 Future Projections	170
(Table-1) 5-year survival rates of prostate cancer	172
(Table-3) 5-year survival rates of prostate cancer • surgical cases	172
(Table-4) Stage distribution in prostate cancer	172
(Table-5) Distribution of T factors in prostate cancer	173
(Table-6) Ratio of each treatment in prostate cancer	173
(Table-7) Age distribution in prostate cancer	173
(Table-8) Ratio of each treatment in prostate cancer	174
(Table-9) Survival rate for each year in prostate cancer (2000)	174
(Table-10) Calculation of total surviving patients of prostate cancer (2000)	174
(Table-11) Calculation of total surviving patients of prostate cancer by definite integration (2000)	174
(Table-12) Transition of the number of prostate cancer patients (our estimates)	175
(Table-13) Number of cancer incidence and deaths for prostate cancer	176
3 References	177

15. Renal Cell Carcinoma 179

1 Summary	179
2 Future Projections	180
(Table-1) Surgery rates of renal cell carcinoma	181
(Table-2) 5-year survival rates of renal cell carcinoma	181
(Table-3) 5-year survival rates and stage distribution of renal cell carcinoma	181
(Table-4) Survival rate for each year of renal cell carcinoma (2000)	182
(Table-5) Calculation of total surviving patients of renal cell carcinoma (2000)	182
(Table-6) Calculation of total surviving patients of renal cell carcinoma by definite integration (2000)	182
(Table-7) Transition of the number of renal cell carcinoma patients (our estimates)	183
3 References	184

16. Bladder Cancer..... 185

1 Summary	185
2 Future Projections	186
(Table-1) 3-year survival rates of bladder cancer	187
(Table-2) Survival rate for each year of bladder cancer (2000)	187
(Table-3) Surgery for primary lesion of bladder cancer	188
(Table-4) Calculation of total surviving patients of bladder cancer (2000)	188
(Table-5) Calculation of total surviving patients of bladder cancer by definite integration (2000)	188
(Table-6) Transition of the number of bladder cancer patients (our estimates)	189
3 References	190

17. Malignant Lymphoma 191

1	Summary	191
2	Future Projections	192
	① Future projections for the number of new-onset and total surviving patients	192
	② NHL and HL	192
	a) The number of new-onset patients	192
	b) The number of total surviving patients	193
	(Table-1) 5-year survival rates of 5 types of NHL and HL	194
	(Table-2) 5-year survival rates of malignant lymphocyte	194
	(Table-3) Ratio of number of registry patients by area	194
	(Table-4-1) Type distribution of malignant lymphocyte ① – based on WHO classification(2008)–	195
	(Table-4-2) Type distribution of malignant lymphocyte ② – based on WHO classification(2008)–	196
	(Table-5) Ratio of NHL and HL in malignant lymphocyte	197
	(Table-7) Number of new-onset malignant lymphocyte patients based on ratio of NHL and HL (2005)	197
	(Table-8) Number of new-onset patients for major 5 types of NHL (2005)	197
	(Table-9) 5-year survival rates of NHL and HL	198
	(Table-10) Survival rate for each year of NHL	198
	(Table-11) Survival rate for each year of HL	198
	(Table-12) Survival rates for each year of major 5 types of NHL	198
	(Table-13) Calculation of total surviving patients of NHL (2005)	199
	(Table-14) Calculation of total surviving patients of HL (2005)	199
	(Table-15) Calculation of total surviving patients of major 5 types of NHL (2005)	199
	(Table-16) Number of total surviving patients of malignant lymphocyte (2005)	200
	(Table-17) Transition of the number of malignant lymphocyte patients (our estimates)	201
	(Table-18) Calculation of total surviving patients of NHL and HL by definite integration (2005)	201
	(Table-19) Future projections for the number of new-onset malignant lymphocyte based on the ratio of NHL and HL	202
	(Table-20) Future projections for total surviving patients of NHL and HL	202
3	References	203

18. Leukemia 205

1	Summary	205
2	Future Projections	206
	(Table-1) Type distribution of leukemia	207
	(Table-2) Results of clinical trials of JALSG study	207
	(Table-3) Ratio of patients aged 65 or over in AML	207
	(Table-4) 5-year survival rates of AML	208
	(Table-5) Treatment results of major clinical trails for childhood ALL	208
	(Table-6) Treatment results for adult ALL(JALSG ALL-97)	208
	(Table-7) 5-year survival rates of ALL	209
	(Table-8) Treatment results for CML(JALSG CML202)	209
	(Table-9) 5-year survival rates of CML	209
	(Table-10) 5-year survival rates of leukemia	209
	(Table-11) Number of new-onset leukemia patients based on the ratio of major types of diseases (2001)	210
	(Table-12) Survival rate for each year of leukemia	210
	(Table-13) Survival rate for each year of AML	210
	(Table-14) Survival rate for each year of ALL	211
	(Table-15) Survival rate for each year of CML	211
